

AIRPORT ASSET MANAGEMENT FOR SENIOR MANAGEMENT & C-SUITE

Assets Management is a key criterion of success for airport leaders in the C-suite. It is an additional tool generating success, savings & revenues, optimizing effectiveness & efficiency of Airports aside of operations.

THE WORKSHOP

How asset management can be used by airport top management to achieve their goals, create value, spend wisely & ideally make savings. The content will provide an overview of current regulations and standards specific to asset management in Airports & their impacts, while clarifying the role executives can take to make the most out of it. We will roll out the process gradually to help you identify the strengths and weaknesses of your assets according to your strategy. Furthermore, we will provide practical elements so you can define the objectives and strategy for your airport assets, tools to implement a global approach.

KEY BENEFITS

Grasp what asset management is, how it allows you to reach organization targets & create value

Understand that top management's commitment to asset management is a key to lead the journey: roles and responsibilities

Discover tools & methods to make meaning out of the current positions of assets & make it evolve
